PROFESSIONAL SUMMARY

React Native Developer with 5+ years of production experience and 6 live apps spanning App Store and Google Play. Expert in building high-quality cross-platform mobile applications end-to-end — native iOS and Android integrations, background location tracking, Live Activities, OTA updates, push notifications, and full store deployment on both platforms. Experienced working remotely for UK-based companies, owning the complete product lifecycle from architecture to release. Holds multiple Meta certifications in React Native, JavaScript, and Mobile Development.

WORK EXPERIENCE

React Native Developer · [Manchester Energy Grants Ltd](#) · Oldham, UK · Remote *Nov 2025 – Present*

- ▶ Sole developer for a UK logistics and energy grants platform, owning the complete mobile product lifecycle end-to-end.
- ▶ Built production React Native iOS apps with Swift native modules, background location tracking, and Live Activity widgets.
- ▶ Managed App Store releases independently — Xcode configuration, provisioning profiles, TestFlight, and OTA updates via CodePush.
- ▶ Implemented push notifications and real-time location features ensuring accuracy, performance, and reliability in production.
- ▶ Collaborated directly with UK stakeholders to translate business requirements into shipped mobile solutions.

React Native Developer · [Invosquare](#) · Lahore, Pakistan · On-site *Nov 2024 – Oct 2025*

- ▶ Developed and maintained high-performance iOS and Android applications using React Native and TypeScript.
- ▶ Integrated third-party APIs and native SDKs across multiple mobile projects, ensuring reliable cross-platform performance.
- ▶ Conducted thorough testing and debugging cycles to meet high-quality standards before each App Store release.
- ▶ Participated in code reviews, providing constructive feedback and enforcing best practices across the team.

React Native Developer · [Hasbisoft](#) · Lahore, Pakistan · On-site *Sep 2022 – Oct 2024*

- ▶ Led cross-platform mobile app development using React Native and TypeScript for both iOS and Android platforms.
- ▶ Built custom native modules bridging platform-specific functionality between React Native and native iOS environments.
- ▶ Developed reusable component libraries, custom hooks, and integrated third-party APIs using Zustand and MMKV.
- ▶ Reduced app startup time by 20% through lazy loading, code splitting, and state management optimisation.
- ▶ Managed App Store and Google Play deployments, CI/CD pipelines, and ongoing production support.
